Standards

## NATIONAL BUREAU OF STANDARDS

The National Bureau of Standards<sup>1</sup> was established by an act of Congress March 3, 1901. The Bureau's overall goal is to strengthen and advance the Nation's science and technology and facilitate their effective application for public benefit. To this end, the Bureau conducts research and provides: (1) a basis for the Nation's physical measurement system, (2) scientific and technological services for industry and government, (3) a technical basis for equity in trade, and (4) technical services to promote public safety. The Bureau consists of the Institute for Basic Standards, the Institute for Materials Research, the Institute for Applied Technology, the Institute for Computer Sciences and Technology, and the Office for Information Programs.

**THE INSTITUTE FOR BASIC STANDARDS** provides the central basis within the United States of a complete and consistent system of physical measurement; coordinates that system with measurement systems of other nations; and furnishes essential services leading to accurate and uniform physical measurements throughout the Nation's scientific community, industry, and commerce. The Institute consists of a Center for Radiation Research, an Office of Measurement Services and the following divisions:

Applied Mathematics — Electricity — Mechanics — Heat — Optical Physics — Nuclear Sciences<sup>2</sup> — Applied Radiation<sup>2</sup> — Quantum Electronics<sup>3</sup> — Electromagnetics<sup>3</sup> — Time and Frequency<sup>3</sup> — Laboratory Astrophysics<sup>3</sup> — Cryogenics<sup>3</sup>.

**THE INSTITUTE FOR MATERIALS RESEARCH** conducts materials research leading to improved methods of measurement, standards, and data on the properties of well-characterized materials needed by industry, commerce, educational institutions, and Government; provides advisory and research services to other Government agencies; and develops, produces, and distributes standard reference materials. The Institute consists of the Office of Standard Reference Materials and the following divisions:

Analytical Chemistry — Polymers — Metallurgy — Inorganic Materials — Reactor Radiation — Physical Chemistry.

**THE INSTITUTE FOR APPLIED TECHNOLOGY** provides technical services to promote the use of available technology and to facilitate technological innovation in industry and Government; cooperates with public and private organizations leading to the development of technological standards (including mandatory safety standards), codes and methods of test; and provides technical advice and services to Government agencies upon request. The Institute consists of a Center for Building Technology and the following divisions and offices:

Engineering and Product Standards — Weights and Measures — Invention and Innovation — Product Evaluation Technology — Electronic Technology — Technical Analysis — Measurement Engineering — Structures, Materials, and Life Safety<sup>4</sup> — Building Environment<sup>4</sup> — Technical Evaluation and Application<sup>4</sup> — Fire Technology.

**THE INSTITUTE FOR COMPUTER SCIENCES AND TECHNOLOGY** conducts research and provides technical services designed to aid Government agencies in improving cost effectiveness in the conduct of their programs through the selection, acquisition, and effective utilization of automatic data processing equipment; and serves as the principal focus within the executive branch for the development of Federal standards for automatic data processing equipment, techniques, and computer languages. The Center consists of the following offices and divisions:

Information Processing Standards — Computer Information — Computer Services — Systems Development — Information Processing Technology.

**THE OFFICE FOR INFORMATION PROGRAMS** promotes optimum dissemination and accessibility of scientific information generated within NBS and other agencies of the Federal Government; promotes the development of the National Standard Reference Data System and a system of information analysis centers dealing with the broader aspects of the National Measurement System; provides appropriate services to ensure that the NBS staff has optimum accessibility to the scientific information of the world. The Office consists of the following organizational units:

Office of Standard Reference Data — Office of Technical Information and Publications — Library — Office of International Relations.

<sup>1</sup> Headquarters and Laboratories at Gaithersburg, Maryland, unless otherwise noted; mailing address Washington, D.C. 20234.

<sup>2</sup> Part of the Center for Radiation Research.

<sup>3</sup> Located at Boulder, Colorado 80302.

<sup>4</sup> Part of the Center for Building Technology.

# **An Index of State Specifications and Standards**

**Linda L. Grossnickle, Editor**

This computer-produced Index contains the permuted titles of more than 6,000 State purchasing specifications and standards issued by 37 State Purchasing Offices thru 1971. The title of each specification and standard can be found under all the significant key words which it contains. These key words are arranged alphabetically down the center of each page together with their surrounding context. The date of publication or latest revision, the specification or standard number, and an abbreviation for each State appear as part of each entry. A list of these abbreviations and the names and addresses of the State Purchasing Officials are found at the beginning of the Index.

Key words: Index of State specifications and standards; Key-Word-In-Context index of State specifications and standards; purchase specifications and standards, State; specifications, State; standards, State; State specifications and standards.

## **1. Introduction**

At the 1969 Meeting of the National Association of State Purchasing Officials (NASPO) in Salt Lake City, Utah a resolution was passed which authorized the Committee on Standards to request the National Bureau of Standards "to cooperate and assist in developing a national collection and index of State specifications and standards." Mr. Herman Crystal, Chairman of the NASPO Committee on Standards, was the key figure in initiating NASPO's resolution. He considered the contribution of State specifications and standards to NBS by the State Purchasing Offices one of the most important projects suggested by NASPO. This represented the first real start towards the coordination of State-prepared specifications.

Dr. Lewis M. Branscomb, former Director of the National Bureau of Standards, subsequently responded to that request by inviting the members of NASPO to join in a cooperative effort. He requested of each State Purchasing Office (1) a listing, if available, of its specifications and standards, (2) cross references to nationally recognized specifications and standards such as Federal and ASTM, and (3) copies of each of the specifications and standards, except those for foods and drugs.

Thirty-seven states responded by sending the requested information. In addition, Alabama, Maine, and Mississippi indicated that they had no specifications or standards programs, and Colorado and

West Virginia said they were developing such programs.

The permuted titles of the more than 6,000 specifications and standards received from the states are listed in this computer-produced Index. Excluded are bids, qualified products lists, and contracts. This Index will serve to update the Index of State Specifications on Commodities published by NASPO in 1963, 1964, and 1966.

Copies of any of the specifications and standards listed should be ordered from the appropriate offices listed in section 4. Documents should be ordered by number and title. Reference copies of these documents are included in a collection of more than 120,000 U.S. industry, government, foreign national and international specifications, standards, test methods, and recommended practices maintained by the Bureau's Standards Information Services Section (NBS-SIS). The section, which is a component of the Engineering and Product Standards Division, NBS-SIS, is located at the NBS site in Gaithersburg, Maryland (about 20 miles northwest of Washington, D.C.), and is open to the public on weekdays between 8:30 a.m. and 5:00 p.m. The staff answers inquiries made in person or by telephone or letter. Letters should be addressed to the Standards Information Services Section, National Bureau of Standards, Building 225, Room B159, Washington, D.C. 20234. All comments, suggestions, or questions on this Index are welcome and should be addressed to the Editor at the same address.

## 2. How to Use the Index

### 2.1. Index Entries

An Index entry may contain as many as six items of information. The first item given is the title of the specification or standard. Generally, the key words found in the title are sufficient to identify the product or article covered; however, in some instances additional descriptive terms have been added to the title to aid in identifying the contents. Over 400 words, which are meaningless for searching purposes, do not appear as key words. Examples are: "and," "for," "characteristics," "general," and "method." A list of these words appears in section 5, "Stop List." The second item is the year of publication or latest revision. When the year does not appear on the standard or specification, the current year is assigned followed by a question mark. When applicable, the third and fourth items of information designate Federal or industry standards or specifications which form part of, or are similar or identical to, the State specifications. Because of space limitations, no more than three such cross references appear in an entry. These references consist of an acronym identifying the organization which published the standard (item 3) followed by the standard number (item 4). The organization acronyms are as follows:

AASHO	American Association of State Highway Officials
AIA	American Insurance Association
AISI	American Iron & Steel Institute
ANSI	American National Standards Institute
ASTM	American Society for Testing and Materials

CE	U.S. Army Corps of Engineers
CFR	Code of Federal Regulations
FED	Federal Specifications and Standards of the General Services Administration
ICC	Interstate Commerce Commission
IPCEA	Insulated Power Cable Engineers Association
MIL	Department of Defense
NACM	National Association of Chain Manufacturers
NASPO	National Association of State Purchasing Officials
NEMA	National Electrical Manufacturers Association
NFPA	National Fire Protection Association
NSF	National Sanitation Foundation
OPNAV	Office of the Chief of Naval Operations
SAE	Society of Automotive Engineers, Inc.
UL	Underwriters' Laboratories, Inc.
USC	U.S. Department of Commerce

The last two items of information given are an abbreviation identifying the State issuing the specification or standard and the number assigned to the standard or specification by that State. This information is always found in the right-hand columns of the Index. A list of the State abbreviations used appears in section 3. If a state has not assigned a number to a specification, there appears as asterisk (\*) plus a number 1, 2, 3, etc. Numbers marked with asterisks serve as retrieval devices for the staff of the Information Center and should not be used when ordering specifications.

### Sample Entry:

	(1)	(2)	(3)	(4)	(5)	(6)
Spec. for MOWERS:	Lawn, Hand Operated	(1968)	FED	00-M-671	PAM	-65

- 
- (1) Title
  - (2) Year of publication or latest revision
  - (3) Cross reference abbreviation for Federal Specification
  - (4) Federal Specification number
  - (5) Abbreviation for the State of Pennsylvania, which issued the specification
  - (6) Specification number assigned by Pennsylvania

## 2.2. Reading the Index

The title of each specification or standard can be found under all the significant key words which it contains. These key words are arranged alphabetically down the center of each page together with their surrounding context. Each title is assigned only one line in the Index; therefore, titles longer than one line have been cut by the computer. This truncation is indicated by a virgule (/) at the point where the title was cut (see entry 2 in sample listing below). Occasionally both ends of a title will

be truncated. When this situation occurs, the virgule will be omitted (see entry 3). Missing portions of a title can be found by locating in the index one or more of the title's other key words.

An entry line is read from left to right beginning after the longest blank space in the line. If the longest blank space is not at the beginning of the line, the entry will be continued at the left hand margin of the same line, as shown in sample entries 1 and 2. Because of the variable width characters, when a line is truncated, the line does not print full left and right.

### Sample Entries

(1) Heavy (1968)	Spec. for Ice	Machine Oil, Refrigeration,	CA 681-91-52
(2) Cutting Rose /Spec. for Industrial Oil (Ice		Machine Refrigeration, Turbine,	IN *15-11
(3) Exerciser, Automatic Tennis Ball Throwing		Machine, Starting Pistol and	NY 30200-0587

The computer programs for the Index were prepared by the Office of Computer Information, Center for Computer Sciences and Technology, National Bureau of Standards. The editor wishes to give special acknowledgement to Michael Kep-linger and Helen Hawes of that Office.

## 3. List of State Abbreviations

Abbreviation	State		
AL	ALABAMA	MT	MONTANA

## 4. List of State Purchasing Offices—Continued

### KANSAS

Henry H. Knouft  
Director of Purchases  
Purchasing Division  
Department of Administration  
State Office Building  
Topeka, Kansas 66612  
(913) 296-2376

### KENTUCKY

Clarence M. Tabor  
Director of Purchases  
Department of Finance  
Capitol Annex Building, Room 348  
Frankfort, Kentucky 40601  
(502) 564-4510

### LOUISIANA

Sheffield C. Spring  
Director of Purchasing  
Division of Administration  
Purchasing & Property Control  
P.O. Box 44095  
State Capitol  
Baton Rouge, Louisiana 70804  
(504) 389-6692

### MAINE

Linwood F. Ross  
State Purchasing Agent  
Bureau of Purchases  
State Office Building  
Augusta, Maine 04330  
(297) 289-3521  
John R. Dyer, CPPO  
Deputy State Purchasing Agent

### MARYLAND

Stanley J. Hanna  
Acting Chief  
Department of General Services  
Purchasing Bureau  
610 Reisterstown Road  
Pikesville, Maryland 21208  
(301) 486-0200

### MASSACHUSETTS

Alfred C. Holland  
State Purchasing Agent  
Commission of Administration & Finance  
Department of General Services  
Room 126, State House  
Boston, Massachusetts 01233  
(617) 727-2882

### MICHIGAN

Frank J. Pennoni  
Chief of Purchasing  
Purchasing Division  
Department of Administration  
2nd Floor, Mason Building  
Lansing, Michigan 48913  
(517) 373-0300

### MINNESOTA

Alan O. Vessey  
Director of Procurement  
Department of Administration  
Division of Procurement  
112 Administration Building  
St. Paul, Minnesota 55101  
(612) 221-2600  
Milton Christen, Standards Engineer  
Division of Procurement

### MISSISSIPPI

H.R. Smith, Asst. Supervisor  
Purchase Division  
Commission of Budget & Accounting  
P.O. Box 267  
Jackson, Mississippi 39205

### MISSOURI

Robert L. Norris  
State Purchasing Agent  
Office of State Purchasing Agent  
P.O. Box 539  
Jefferson City, Missouri 65101  
(314) 636-5201

### MONTANA

Harold F. Weggenman, Director  
Purchasing Division  
Department of Administration  
Room 109, State Capitol Building  
Helena, Montana 59601  
(406) 449-2575

Ralph Kenyon, State Controller

### NEBRASKA

Charles W. Neal  
Director of Purchasing

Spec. for 20 Ft. Van Type Body for	Mounting on Truck (1969)	MI	3958-0165	
Spec. for Crane, 4000 Lb. Capacity Electric Powered (for	Mounting on Vehicle) (1968)	NJ	4938-121	
Spec. for Snow Plow Attachment (for Front	Mounting on 2 Ton (16,000 G.V.W.) Trucks (1970)	SC	14-410-0451	
Spec. for Automotive Equipment (Truck for	Mounting on 20 Ft. Van Body) (G.V.W. 53,000 Lb.) (1968)	NY	40500-0714	
Spec. for Spreader, Hydraulic Hopper Type, Dump Body	Mounting (1965)	NJ	4938-78	
Spec. for Bituminous Distributor for Truck	Mounting (1969)	SC	14-120	
Spec. for Sloper Attachment for Grader	Mounting (1969)	SC	14-450	
Spec. for Mist Sprayer (300 Gal.) Truck Bed	Mounting (1971)	NY	46800-0776	
for Tailgate Roller (Vibrating, Self Propelled, Dump Truck	Mounting) for Asphalt Compaction for Patching Operation	AK	*52	
preader (Auger Feed, Single Spinner Type, Sand, Dump Truck	Mounting) (Hospital) (1971)	Spec. for Material S	NY	41000-0243
ader, Minimum 6 cu. Yd. Struck Capacity Hopper Body (Truck	Mounting) (Salt, Sand, Chips, Cinders, Calcium Chloride	NY	41000-0182	
lically Operated Hopper Body Material Spreader (Dump Truck	Mounting) (1968)	Spec. for Hydran	NY	41000-0071
Spec. for Mist Sprayer (150 Gal. or More) (Pickup Truck	Mounting) (1969)	NY	46800-0861	

## NBS Index of State Specifications and Standards

c. for Snow Plows (One Way, Safety Trip, High Speed, Truck y – Salt, Sand, Chips, Cinders and Calcium Chloride, Truck pec. for Detector Mast Arm Poles (Overhead Traffic Control preader (Hydraulically Operated Hopper Body for Dump Truck y (Salt, Sand, Chips, Cinders and Calcium Chloride), Truck Spec. for Milk Tank Body, 1,500 Gal. ANNOUNCEMENT OF SUPPLEMENTS AND REVISIONS  
OF THE  
NATIONAL BUREAU OF STANDARDS  
SPECIAL PUBLICATION 375

Standards Information Services Section  
Bldg. 225, Room B159  
Engineering and Product Standards Division  
National Bureau of Standards  
Washington, D.C. 20234

Dear Sir:

Please add my name to the announcement list of supplements and revisions of National Bureau of Standards Special Publication 375, "An Index of State Specifications and Standards."

NAME \_\_\_\_\_

Company \_\_\_\_\_

Address \_\_\_\_\_

City \_\_\_\_\_ State \_\_\_\_\_ Zip Code \_\_\_\_\_

..... cut here .....

U.S. DEPT. OF COMM. BIBLIOGRAPHIC DATA SHEET		1. PUBLICATION OR REPORT NO. NBS SP-375	2. Gov't Accession No.	3. Recipient's Accession No.
4. TITLE AND SUBTITLE  An Index of State Specifications and Standards			5. Publication Date September 1973	
			6. Performing Organization Code	
7. AUTHOR(S) Editor - Linda L. Grossnickle			8. Performing Organization	
9. PERFORMING ORGANIZATION NAME AND ADDRESS  NATIONAL BUREAU OF STANDARDS DEPARTMENT OF COMMERCE WASHINGTON, D.C. 20234			10. Project/Task/Work Unit No.	
			11. Contract/Grant No.	
12. Sponsoring Organization Name and Address  Same as No. 9			13. Type of Report & Period Covered  Final	
			14. Sponsoring Agency Code	
15. SUPPLEMENTARY NOTES				
16. ABSTRACT (A 200-word or less factual summary of most significant information. If document includes a significant bibliography or literature survey, mention it here.)  This computer-produced Index contains the permuted titles of more than 6,000 State purchasing specifications and standards issued by 37 State Purchasing Offices thru 1971. The title of each specification and standard can be found under all the significant key words which it contains. These key words are arranged alphabetically down the center of each page together with their surrounding context. The date of publication or latest revision, the specification or standard number, and an abbreviation for each State appear as part of each entry. A list of these abbreviations and the names and addresses of the State Purchasing Officials are found at the beginning of the Index.				
17. KEY WORDS (Alphabetical order, separated by semicolons) Index of State specifications and standards; Key-Word-In-Context index of State specifications and standards; purchase specifications and standards, State; specifications, State; standards, State; State specifications and standards.				
18. AVAILABILITY STATEMENT  <input checked="" type="checkbox"/> UNLIMITED.  <input type="checkbox"/> FOR OFFICIAL DISTRIBUTION. DO NOT RELEASE TO NTIS.		19. SECURITY CLASS (THIS REPORT)  UNCLASSIFIED	21. NO. OF PAGES  394	
		20. SECURITY CLASS (THIS PAGE)  UNCLASSIFIED	22. Price  \$3.70

## PERIODICALS

**JOURNAL OF RESEARCH** reports National Bureau of Standards research and development in physics, mathematics, and chemistry. Comprehensive scientific papers give complete details of the work, including laboratory data, experimental procedures, and theoretical and mathematical analyses. Illustrated with photographs, drawings, and charts. Includes listings of other NBS papers as issued.

*Published in two sections, available separately:*

• **Physics and Chemistry (Section A)**

Papers of interest primarily to scientists working in these fields. This section covers a broad range of physical and chemical research, with major emphasis on standards of physical measurement, fundamental constants, and properties of matter. Issued six times a year. Annual subscription: Domestic, \$17.00; Foreign, \$21.25.

• **Mathematical Sciences (Section B)**

Studies and compilations designed mainly for the mathematician and theoretical physicist. Topics in mathematical statistics, theory of experiment design, numerical analysis, theoretical physics and chemistry, logical design and programming of computers and computer systems. Short numerical tables. Issued quarterly. Annual subscription: Domestic, \$9.00; Foreign, \$11.25.

## TECHNICAL NEWS BULLETIN

The best single source of information concerning the Bureau's measurement, research, developmental, cooperative, and publication activities, this monthly publication is designed for the industry-oriented individual whose daily work involves intimate contact with science and technology—for engineers, chemists, physicists, research managers, product-development managers, and company executives. Includes listing of all NBS papers as issued. Annual subscription: Domestic, \$6.50; Foreign, \$8.25.

## NONPERIODICALS

**Applied Mathematics Series.** Mathematical tables, manuals, and studies.

**Building Science Series.** Research results, test methods, and performance criteria of building materials, components, systems, and structures.

**Handbooks.** Recommended codes of engineering and industrial practice (including safety codes) developed in cooperation with interested industries, professional organizations, and regulatory bodies.

**Special Publications.** Proceedings of NBS conferences, bibliographies, annual reports, wall charts, pamphlets, etc.

**Monographs.** Major contributions to the technical literature on various subjects related to the Bureau's scientific and technical activities.

**National Standard Reference Data Series.** NSRDS provides quantitative data on the physical and chemical properties of materials, compiled from the world's literature and critically evaluated.

**Product Standards.** Provide requirements for sizes, types, quality, and methods for testing various industrial products. These standards are developed cooperatively with interested Government and industry groups and provide the basis for common understanding of product characteristics for both buyers and sellers. Their use is voluntary.

**Technical Notes.** This series consists of communications and reports (covering both other-agency and NBS-sponsored work) of limited or transitory interest.

**Federal Information Processing Standards Publications.** This series is the official publication within the Federal Government for information on standards adopted and promulgated under the Public Law 89-306, and Bureau of the Budget Circular A-86 entitled, Standardization of Data Elements and Codes in Data Systems.

**Consumer Information Series.** Practical information, based on NBS research and experience, covering areas of interest to the consumer. Easily understandable language and illustrations provide useful background knowledge for shopping in today's technological marketplace.

## BIBLIOGRAPHIC SUBSCRIPTION SERVICES

The following current-awareness and literature-survey bibliographies are issued periodically by the Bureau:

**Cryogenic Data Center Current Awareness Service** (Publications and Reports of Interest in Cryogenics). A literature survey issued weekly. Annual subscription: Domestic, \$20.00; foreign, \$25.00.

**Liquefied Natural Gas.** A literature survey issued quarterly. Annual subscription: \$20.00.

**Superconducting Devices and Materials.** A literature survey issued quarterly. Annual subscription: \$20.00. Send subscription orders and remittances for the preceding bibliographic services to the U.S. Department of Commerce, National Technical Information Service, Springfield, Va. 22151.

**Electromagnetic Metrology Current Awareness Service** (Abstracts of Selected Articles on Measurement Techniques and Standards of Electromagnetic Quantities from D-C to Millimeter-Wave Frequencies). Issued monthly. Annual subscription: \$100.00 (Special rates for multi-subscriptions). Send subscription order and remittance to the Electromagnetic Metrology Information Center, Electromagnetics Division, National Bureau of Standards, Boulder, Colo. 80302.

Order NBS publications (except Bibliographic Subscription Services) from: Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.
